DNS

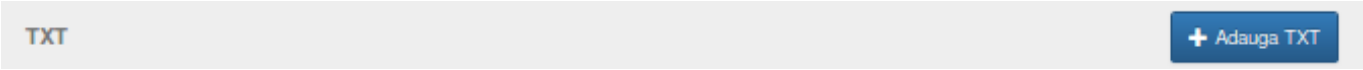
Cum adaug setarea DNS pentru Google Search?

Dupa logare in interfata de administrare de pe site-ul **Zooku.ro** (https://my.zooku.ro) accesati meniul **Administrare gazduire**

- click pe numele domeniului la care doriti sa faceti modificari

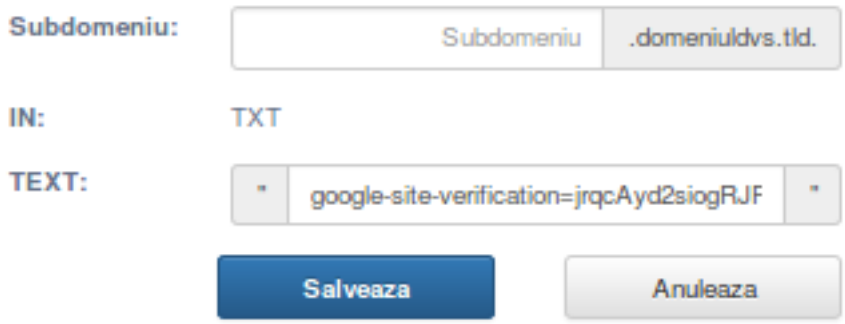
- click pe **DNS**

- la campul **TXT** apasati pe **Adauga TXT**



- in campul **Subdomeniu** nu completati nimic

in campul **TEXT** adaugati codul din Interfata Google Search, el este de forma: google-site-verification=jrqcAyd2siogRJFE1e5H7Qlk9CT82f3t-vzJ69Q **fara ghilimele**



- **salveaza**

- dupa ce se propaga **DNS** (15-20 de minute se poate face validarea)
